

# Bulgarian BXM Explosion-proof Distribution Box

## Overview

BXM (D)8050 Series Explosion Proof. ♦ The explosion-proof illumination distribution boxes is equipped with compound design: Combines flameproof (Ex d) and increased safety (Ex e) chambers for flexible protection. The main switch and sub switch operation panels can be distinguished according to color. For outdoor use, rainproof cover or protective cabinet can be added. The material can be customized according to user requirements. This series of products have good explosion-proof function, suitable for IIA, IIB, IIC explosive gas environment and various flammable and explosive sites, mainly used in railway, power, metallurgy, petroleum, petrochemical, chemical, iron and steel, aviation, ships and various factory areas. BXM (Explosion Proof) Distribution Box is a standard distribution box for Heat Trace Cable of electricity antifreeze, using a hanging or vertical box structure, power cable entry at the bottom of the box, IP54 protection Level, a variety of air circuit breakers are installed, with leakage. The BXM (D)58 series explosion-proof distribution box is designed for safe and reliable power and lighting distribution in hazardous areas. It is widely used in industries such as oil & gas, chemical plants, offshore platforms, and dust hazardous environments. (hereinafter referred to as KGV Electric), founded in 2011, is a high-tech enterprise focusing on the R&D and manufacturing of explosion-proof electrical appliances and industrial lighting.
