

Distribution Box Shielding Mesh Cover

Overview

This transparent protective cover is designed for panels and control cabinets, providing maximum protection in demanding industrial and environmental conditions. The RF shielded boxes enable reliable and reproducible measurements when a shielded test environment shielding box. We manufacture in our own mechanical milling centre and in our own electronic production, individual shielding boxes in different sizes, with special interfaces. Automotive industry Shielding meshes protect critical vehicle components – from control systems and engine functions to infotainment, driver assistance, and safety systems – against disruptive electromagnetic radiation. With the rise of electric vehicles, shielding battery management systems and. Space-saving closure solution for your pallet cages: Self-locking plastic covers from swissplast close your Euroboxes, stacking frames or pallet cages securely, waterproof and dustproof. The overlapping plug-in system enables safe stacking of the wire mesh boxes – whether in the warehouse or during. The groove contours of electronic distribution boxes and the very narrow grooves of micro-distribution housings are seamlessly sealed with the sealing foams of the polyurethane-based FERMAPOR K31 or the silicone-based FERMASIL product families. The prerequisite for the exact application of sealing. EMI shielding mesh is made of stainless steel wire mesh as well as copper and brass woven wire mesh to protect key equipment from RFI (Radio Frequency Interference) and/or EMI (Electromagnetic interference). Sewn-in plastic corners protect the cover from the sharp edges of the pallet cage.
