

Does the telecom company need fiber optic cable to upgrade to 200Mbps

Overview

Fiber optic cables offer numerous advantages over traditional copper cables, making them essential for a 2. The broadband network in Germany is already very well developed: Deutsche Telekom alone has expanded its fiber-optic network to a total length of more than 750,000 kilometers in the interim. And the network grows larger every day. That's why more and more households that are still using DSL to surf. The optical network terminal (ONT) is the critical component that converts fiber optic signals into data your devices can use. Post-installation optimization matters —proper router placement, firmware updates, and network security configuration maximize your fiber internet investment. But is it always the right time to upgrade?

This fiber optic cable selection guide helps you decide whether now is the right time to buy fiber optic. According to ResearchAndMarkets, the global market for fiber optics was estimated at \$5. 8 billion in 2022 and is expected to reach \$11. This is the dominant broadband access technology across half of OECD countries today. Source: OECD broadband. However, as these networks struggle to keep up with increasing demand, the need for upgraded infrastructure is becoming critically important.
