

Fiber optic cable fault LOS red light

Overview

- Common Cause: Fiber line damage, ISP outage, or faulty equipment. □□ Step-by-Step Troubleshooting (Try in Order!): 1□ Quick Power Cycle: Unplug your router & modem for 60 seconds. 2□ Check All Cable Connections: Ensure the fiber/coaxial cable is firmly seated. 3□ Inspect the. The LOS light on your router indicates the status of your internet connection to the Internet Service Provider (ISP). When it's green and steady, everything is fine. However, when it blinks red or stays solid red, it signifies a Loss of Signal, a problem preventing your router from communicating. If the LOS light on your fiber router or ONT is blinking red, it usually means Loss Of Signal. This guide explains the likely causes, the checks you can do at home, and when the issue needs technician support. In most cases, a loss of signal indicates a technical issue with the ISP, but it could also be a problem with your. First noticed the SH2 flashing purple and lastly moved a unit out the way to get a good view of the Openreach modem.
