

Fiber optic cable fault tracker with terminal

Overview

Works with virtually all common fiber optic sizes and connector types, allowing you to test cables prior to install and test patch & breakout cables for faults. Powerful 10mW laser makes faults easy to see. In today's fast-paced workplace maximizing productivity is essential. Whether installing new fiber links or troubleshooting an existing network, the faster you can locate a problem, the. Easily identify and locate faults in fiber optic cabling with VFF5 The Visual Fault Finder VFF5 projects a highly visible laser light source into fiber optic cabling. This is used to check continuity, locate breaks, poor mechanical splices and damaged connectors. Visual fault locators for fiber bends and breaks, localization of damages and end-to-end continuity check. By pinpointing the exact location of fiber damage, technicians can diagnose, troubleshoot, and fix the problem efficiently.
