

Fire protection equipment for cable trays

Overview

Direct Low Pressure (DLP) clean agent systems offer a practical solution for detecting and suppressing fires inside cable trays. A heat-sensitive detection tube runs along the tray. When exposed to a fire's heat, the tube ruptures at the ignition point, triggering immediate. Effective protection of cable systems around the world: our tried-and-tested FLAMMOTECT-A and DG-CR 0. 7 products are successfully used to protect cables in high-rise buildings, industrial buildings, and offshore facilities as well as in sensitive areas, such as hospitals, airports, production. ProReact Linear Heat Detection (LHD) offers a proven solution. FireMaster® products insulate cable trays carrying instrument control cables to ensure that the cables can operate long enough to allow process shut down during fires. The FireMaster® cable tray wrap consists of. FireResistant Solutions provides cable tray covering and fire-protection systems designed to safeguard electrical and data infrastructure in commercial and multifamily buildings. These systems prevent fire and smoke from spreading through open cable pathways, maintaining circuit integrity and code. Our range of trunking and cable tray protection products provide effective fire protection for pipes, cables and trunking within floors, walls and ceilings.
