

Four-core pigtail models

Overview

Available in several standardized types— OM1, OM2, OM3, OM4, and OM5 —these pigtails differ in core diameter, bandwidth capacity, transmission distance, and compatibility with light sources. Choosing the right type depends on your network's speed requirements, distance needs . Leviton fiber optic pigtail kits are a good solution for mechanical or fusion splicing applications. Available in a range of multimode and single-mode fibers with SC, ST or LC connectors. Economy pigtails offer over a. Traditional Fusion Splice-On Connectors with pigtails provide factory-polished performance with field-termination convenience within harsh environments. They are used to fuse optical cables with equipment. Get the wrong connector type, the wrong polish, or skip proper fusion splicing technique—and you're looking at elevated signal loss, increased back reflection, and a. Alston Systems premium range of pigtails are manufactured with high quality standards and are suitable for telecom, data center and other critical applications. Our fiber pigtails are available.
