

Grid-type under-line cable tray

Overview

Grid Cable Trays are metal structures designed to support and organize cables. Made from steel or aluminum, they allow proper airflow and easy access for maintenance. Because of its closed design, this type of tray should be used in applications where there is minimal risk of heat generation and buildup. These trays offer a highly flexible, reliable, and cost-effective solution for cable management, whether in. Cable tray (or cable ladder) systems are a popular alternative to electrical conduit systems, as they have an outstanding record for dependable service, design flexibility and cost savings in commercial and industrial applications. Our experienced teams and operations are present across the Middle-East North Africa regions (MENA) and Pakistan, giving us an extensive regional network that benefits our clients and partners. The pathway sections shall be provided in five widths: 8" (203mm), 12" (305mm), 18" (457mm), 24" (610mm) and 30" (762mm).
