

# Height of Data Center Micro-Module Server Room

## Overview

✓ Minimum finished ceiling height: 2.5 feet) ✓ Recommended clearance above racks: At least 1 meter (3. However, depending on the layout and additional infrastructure requirements, a higher ceiling may be necessary. With sturdy slab flooring in the vast majority of cases, our 4MW modules are laid out to best accommodate your 24 to 30 rack rows and feature a minimum ceiling height of 12' 6" for easier cabling and maintenance. If you need a raised floor, our designs can still accommodate rack weight of greater. Huawei FusionModule800 offers an intelligent small data center solution, perfect for financial, government, healthcare, and energy sectors, combining compact design with advanced management features for enhanced performance. The interior height, which is important for usability, is measured in U (height unit) in an internationally standardized way. Some standard dimensions have become.
