

# How to Choose Fiber Optic Cable Lines for Surveillance

## Overview

Understand how to choose fiber optic cable by comparing single-mode vs. multimode, network speed and distance needs, cable jackets/fire ratings, connectors, cost and future-proofing for data and telecom networks. Fiber optic perimeter security systems are designed to safeguard physical boundaries. When an intruder climbs a fence, digs. Fiber Optic: Uses light to transmit data, offering unmatched speed, distance, and immunity to interference. Pros: Inexpensive, widely available, easy to install. Cons: Limited to 100 Mbps, high interference, not suitable for modern high-resolution cameras. But is it always the right time to upgrade?

This fiber optic cable selection guide helps you decide whether now is the right time to buy fiber optic. And then there is fiber-optic cabling, with its interference immunity, better inherent security, robust distances and huge bandwidth capability.
