

Huawei Fiber Optic Switch 96 Ports

Overview

Huawei OceanStor SNS3096 FC Switch is a Fibre Channel (FC) switch in data center network infrastructure with a maximum of 96 ports in increments of 24; the number of general-purpose ports can be increased to 48, 72, or 96 using PoD licenses. An active optical cable (AOC) is a fixed-length optical fiber with optical modules at both ends. It can be directly connected to an optical port on a device. Huawei switches already help customers achieve success in industries such as finance, Internet, retail, education. Cisco MDS 9396V 64-Gbps 96-Port Fibre Channel switch brings the latest high-performance, low-latency Fibre Channel Storage Area Network (SAN) technology to market. Along with higher bandwidth, the Cisco MDS 9396V switch supports ease of configuration and management, detailed and in-depth. Table 4-483 lists the mapping between the S5720-52X-SI-48S chassis and software versions. To. Huawei S9300E series (S9300E for short) terabit routing switches are next-generation high-end smart switches tailored for multiservice networks.
