

Is it enough to just plug in the fiber optic panel

Overview

The fiber optic cable does not plug directly into a standard home router because the signal type must be translated. The fiber is connected to an Optical Network Terminal (ONT) inside or outside your home. The ONT is linked to your router or gateway using an Ethernet cable. [org/wiki/Network_interface_device#Optical_network_terminals](https://en.wikipedia.org/wiki/Network_interface_device#Optical_network_terminals) Some ISP's use ONT's that have integrated routers - its easier for THEM but it gives them more control over. Fibre optics involves the use of thin strands of glass or plastic, known as optical fibres, to transmit data as light signals. Unlike traditional copper cables that use electrical signals, fibre optic. Should I also consider running fiber optic cables in walls while I have the chance to avoid having to drill walls in the future if I decide to upgrade?

Are there any caveats around running fiber cables inside brick walls?

Are there any reasons not to run fiber at home?

Can I use a wall socket like. Currently my fiber line just comes in through a hole in side of my living room wall. I would like to move that wire on the outside of the house to a hole that goes into the basement then run it to a wall jack that has both fiber and rj45.
