

Is it legal to sell fiber optic cables from poles

Overview

Yes there are rules in place that allow providers to make use of Openreach, the incumbent national network that owns the majority of the UK's poles and ducting, through something called Physical Infrastructure Access. Data shows that PIA is being used widely by a range of companies. Local governments, municipalities, or private landowners may charge high fees for access to. These can range from cables and poles to fibre optic networks and meters. Understanding what each type involves helps you know your rights and responsibilities. This includes installing poles, underground cables, and. A new telegraph pole has gone up at the end of my street, didn't think anything of it. Yesterday contractors strung cables across my property to a neighbouring pole in an adjoining street. Would normally be a problem, but I'm a licensed radio ham and have two extendable masts, 12m each which carry. The House of Commons Library has released a new briefing paper that clearly lays out the rules governing the use of telegraph poles for broadband networks – an issue that's sparked growing controversy in some UK communities.
