

# Jxf distribution box incoming line

## Overview

There are knock-out holes on the top and bottom of the box, and a pre-installed perforated plate can be reserved for multi-tube incoming lines. The maximum rated current can reach 630A. It is especially suitable for user metering control boxes in factories, mines, hotels. Type, a "R" is added after the Specification. For single row 20, and circuit 24, after confirming the wires meet the requirements. Close normal operation due to poor manufacture quality. A paid repair will be provided if the warranty period expires. For any damage due to one of the following. It is suitable for circuits with AC frequency of 50HZ and rated working voltage below 500V. The boxes are made of cold-rolled steel or stainless steel, have an IP55 rating, and come in various standard sizes from 200x200x150mm to 1800x1000x300mm. The frame of the JXF low-voltage Switchgear is a combined structure, and the basic skeleton is assembled from C-shaped steel. All structural parts of the cabinet rack are. Low voltage distribution box-JXF series Overview JXF Series distribution box is a kind of distribution equipment with various control functions assembled based on the type, specification and quantity of components.
