

# Product Secondary Distribution Box

## Overview

The Secondary Distribution Box (SDB) receives power from Main Power Distribution box via an extender cable and provides a central power distribution to feed normal branch circuits to the electric floor modules through snap-on extender cables.

Secondary packaging is the box or wrapper that holds a bunch of products together—like a carton holding juice boxes—so they're easier to move, store, or sell. /

Credit: ML Robinson/Shutterstock Once considered merely a protective shell for products in transit, secondary packaging has undergone a. Smart Grid Integration: Boxes with IoT sensors for remote monitoring and load management. Enhanced Safety Features: Arc-fault detection, advanced circuit protection, and improved insulation. The remarkable benefits of this packaging have increased its demand in the market. The SDB can be fitted with terminal blocks for custom. ACS takes the basic idea of zone wiring and combines it with pre-cut, pre-tested cable and plug-in connectors, to provide power and telecommunication systems that can be installed under raised floors (The Intelligent Floor), or in accessible ceilings (The Intelligent Ceiling).
