

# Rack-mounted lithium battery cabinet 200kWh for rail transit use

## Overview

The StackRack SRBOX-200 is an outdoor-rated, high-voltage modular battery system that consists of up to 14x 14. 3 kWh batteries for up to 200kWh battery capacity. Designed for integration into large-scale energy storage systems, this high-voltage rack offers a dependable 200kWh lithium ion battery capacity built on lithium iron phosphate modules. With no inverter or PCS bundled, it serves as a core battery component, ready for seamless incorporation into. RACK HV PRO is a high-performance embedded LiFePO<sub>4</sub> battery module, designed for fast installation and easy maintenance. Featuring advanced safety mechanisms, an intelligent Battery Management System (BMS), and an eco-friendly design, it's the perfect choice for power backup and renewable energy. We provide complete solutions for PV power plants and energy storage systems, covering solar PV modules, storage batteries, power conversion systems (PCS), battery management systems (BMS), energy management systems (EMS), and all related electrical equipment. The unit is designed for various energy storage needs, including solar self-consumption, peak energy shaving, energy arbitrage and. BSLBATT ESS-GRID Cabinet Series is an industrial and commercial energy storage system available in capacities of 200kWh, 215kWh, 225kWh, and 245kWh. It offers peak shaving, energy backup, demand response, and increased solar ownership capabilities. Built using advanced lithium battery technology, this high-capacity system delivers reliable, efficient performance for.
