

Requirements for laying optical fiber cables in ducts

Overview

Recommended technical requirements are detailed by reference to IEC 60794-3-11 on outdoor optical fibre cables for duct, directly buried, and lashed aerial applications. Changes and additions to these requirements suitable to the duct and tunnel cable applications are recommended. When working in manholes, precautions must be taken to limit the amount of exposure to lead. Strictly observe your company's lead handling procedures to eliminate this hazard. Failure to do so may result in serious, long-term health problems. The charter of the FOA was to promote professionalism in fiber optics through education, certification, and. Recommendations for Fiber Optic Cable Installation Where reels are supplied with protective material fitted over the cable, the protection should remain in place until the cable will be installed. During installation, all curvatures should be smooth. Note that Recommendation ITU-T L. In this method, cable is pulled through duct with the. ing and blowing a cable in a duct and the impact on the cable designs.
