

Roof cable tray counterweight

Overview

The Counterweight system is the ideal choice for flat roofing projects where there is a need to avoid mechanical anchors that may penetrate and compromise membranes and roof structures. Its versatile configuration allows for a raised support system that makes roof surfaces. As buildings contain more and more devices and systems requiring structured cabling, the need for sturdy cable tray supports is growing. What can we offer?

Technical designs, advice and. The PHP Cable Tray Support is designed for cable systems of various widths at most specified heights above the roof surface. Insert legs of duct support into bases and attach with 2-1/2" bolt and 1/2" nut. Thanks to its robust construction and material, manufactured from high-quality steel with an EZ1000 surface treatment, RoofSupport ensures a safe and durable installation that meets the highest. Rapid, versatile, freestanding edge protection for flat roof construction and renovation projects. Uses a secure counterweight system. They're also designed to maximize job-site efficiency.
