

# Setting up an external router for fiber optic network

## Overview

To set up your router for fiber internet quickly, connect the router to your fiber modem, access the router's settings via a web browser, and input the provided ISP credentials. Make sure to update the firmware, configure Wi-Fi security, and customize your network name for. However, setting up a fiber optic connection to your router can seem daunting if you're unfamiliar with the process. Once you understand the basic concepts, you can check out my Recommended Equipment section toward the bottom of the. When switching to fiber internet, many users wonder if they're able to use their own router instead of the one provided by their internet service provider (ISP). In this guide, we'll explain router compatibility, setup steps and whether upgrading your router is necessary to maximize fiber speeds. However, if you're not accustomed to some of the jargon, like MAC cloning and PPPoE, you may encounter a few.
