

Smart IoT Intelligent Power Distribution Cabinet

Overview

The DTU Intelligent Electrical Control Cabinet is an automated control device designed for power distribution systems. It integrates data acquisition, remote monitoring, fault protection, and communication management into a single unit. Delta, a global leader in power management and a provider of IoT-based smart green solutions, today announced the launch of its new SMART PDU I-Type power management unit. This innovative 1U DC distribution unit delivers unparalleled flexibility and control for telecom network operators, tower. Managing and installing a rack power distribution unit (PDU) has never been easier than with the EL2P PDU. Designed to simplify deployment and take stress out of power distribution, this intelligent PDU helps reclaim valuable hours. Whether that means speeding up Saturday installs or focusing on. You can achieve unified, remote control and monitoring of telecom cabinets across multiple regions by integrating a Smart Power Distribution Unit with an IoT platform.
