

# Spectrometer AQ6370D

## Overview

This instrument enables high speed measurement of the optical properties of LD and LED light sources, optical amps, and other devices. Thank you for purchasing the AQ6370D Optical Spectrum Analyzer. YOKOGAWA provides registered users with a variety of information and services. Please allow us to serve you best by completing the product. Test Equipment Solutions Ltd specialise in the second user sale, rental and distribution of quality test & measurement (T&M) equipment. We stock all major equipment types such as Spectrum Analyzers, Signal Generators, Oscilloscopes, Power Meters, Network Analyzers etc from all the major suppliers. The Yokogawa AQ6370D series optical spectrum analyzer is a high-performance and multifunctional testing instrument widely used in various fields such as optical communication, laser characteristic analysis, fiber amplifier testing, and WDM system analysis.
