

Swisscom fiber optic cable requires a router

Overview

Do I need a new router and do I have to pay anything towards it?

No, you do not need to buy a new router. Depending on your individual situation, Swisscom will provide you with either a new router, a fibre-optic module for insertion into your current router or a fibre-optic cable. In addition, you will need an optical fibre router from your Internet service provider to complete the transition. How much does the optical fibre connection and the fibre-optic socket cost?

The fibre-optic socket is generally installed by Swisscom free of charge. The complete FRITZ!Box range of functions for internet, telephony, and TV (blue TV) is then available to all of the devices in your home network without. Depending on the specific network expansion situation, the Swisscom network supports the following fiber-optic technologies: Swisscom explicitly mentions that only routers and modules certified by Swisscom can be connected to the new 10 Gbit/s technology (XGS-PON). And the Zyxel AX7501 is one of. View and Download Swisscom Internet-Box standard fibre-optic kit setup online. Internet-Box standard network router pdf manual download. The FRITZ!Box is optimally prepared for use with Swisscom. What is an (internet-based) service?

An (internet-based) service is a subscription offered by a telecommunications service provider.
