

What router should I use with a 100Mbps fiber optic cable in a data center

Overview

For fiber optic internet speeds of 100 Mbps or higher, a router supporting at least 1 Gbps is required. Look for routers with AX or AC designations (Wi-Fi 5 or 6) that support faster speeds than older N standards (Wi-Fi 4). Searching for the ideal WiFi router to match your 100 Mbps internet speed?

You're in the right place! In this guide, we'll explore the top routers tailored to deliver optimal performance for your 100 Mbps connection. Whether you're streaming, gaming, or simply browsing, a high-quality router is. A fiber-optic connection is the best choice for fast home internet as it has a number of advantages compared to traditional copper cables, such as faster speeds and less interference. Many major ISPs, such as Verizon and Xfinity, offer fiber connections directly to your door, known as FttP or Fiber. The best router for fiber internet is one that matches your plan speed, home size, and how you use your connection.
