

Wpm refers to the distribution box

Overview

Around 80 percent of all consignments moving in global trade include some type of wood packaging material (WPM), such as pallets, crates, drums, dunnage and other wooden units that are used to secure, protect or assist in the movement of cargo or a commodity. Implement the April 16, 2019 memorandum of understanding (MOU) between the DoD and the United States Department of Agriculture (USDA), Animal and Plant Health Inspection Service (APHIS) Plant Protection and Quarantine (PPQ). Comply with Part 319 of Title 7, Code of Federal Regulations (CFR). Wood packaging material is defined as wood or wood products (excluding paper products) used for supporting, protecting, or carrying cargo, including, but not limited to, dunnage, crating, pallets, packing blocks, drums, cases, or skids. The definition excludes manufactured wood materials, loose. DISTRIBUTION STATEMENT D: DISTRIBUTION AUTHORIZED TO DOD AND U. DOD CONTRACTORS ONLY, ADMINISTRATIVE OR OPERATIONAL USE, 11 MARCH 2019. OTHER REQUESTS FOR THIS DOCUMENT SHALL BE REFERRED TO 406 SCMS/GULAA, (PACKAGING DIVISION), HILL AFB, UTAH 84056. The United States and other countries have committed to enforce the International Standards. WPM is used to ship goods and safely brace and bear the weight of materials in drums, cases, super sacks, pails and others. Exempted Wood Packaging Materials.
