

Zimbabwe Aggregation Switch SFP

Overview

Features 48 Gigabit Ethernet ports and 6 10G SFP+ slots for high-speed uplinks. Supports advanced L3 routing, comprehensive security features, and centralized cloud management through Omada SDN platform. The GWN7830 Series of Layer 3 Aggregation Network Switches offers 3 model options, with up to 24 SFP ports and 12 SFP+ ports, which are ideal for medium-to-large businesses and enterprises that require high-performance networks with maximum capacity and control. These aggregation switches support. An 8-port, Layer 2 switch made for 10G SFP+ connections. E-Machines Zimbabwe is your trusted partner for ICT products, computer hardware, networking. With AXIS D8308 Fiber Aggregation Switch you can connect multiple Axis devices using fiber midspans over long distances. It also enables easy expansion by simply adding more fiber or network switches. With a total non-blocking throughput of 80. Use one of the options below to locate your desired product.
